SUMMARY

Senior Frontend Developer with professional experience building enterprise dashboards, government digital platforms, design systems, CMS-driven websites, and accessible responsive interfaces. Strong in React.js, TypeScript, component architecture, API integration, localization/RTL, and modern frontend tooling, with additional experience in StencilJS, WordPress, Node.js, and CMS platforms.

EXPERIENCE

Senior Frontend Developer

AZMX Saudi Company **October 2024 - October 2026, Remote**

- Najiz Lab: Contributed to user and administrative dashboards for a Saudi digital justice platform using React.js, TypeScript, Vite, Tailwind CSS, TanStack Router, React Query, and Axios.
- Implemented authenticated application flows, API integrations, reusable UI patterns, and real-time notifications with Socket.IO, including token refresh and reconnect behavior.
- Built Arabic-first and English interfaces with i18n and RTL support across roles, users, tasks, challenges, categories, tags, and notification experiences.
- ARG Global Design System (DJA): Developed reusable StencilJS Web Components in a pnpm monorepo using Tailwind CSS and shared design tokens for consistent UI across ARG products.
- Worked with Storybook and Playwright-based component workflows and contributed reusable interface patterns for the shared design system.
- CMS Projects: Contributed to 5 CMS-driven frontend projects, including Payload CMS implementations and Shareek, an Umbraco CMS project with an HTML/CSS/JavaScript frontend.
- Delivered responsive, reusable frontend work under changing requirements and tight timelines while maintaining visual consistency and production readiness.

Frontend Developer (Freelance)

Mashab Agency **February 2024 - September 2025, Remote**

- Developed and deployed a responsive multilingual marketing website using React.js, TypeScript, Tailwind CSS, i18n, and Framer Motion.
- Implemented video-led hero content, inquiry forms, responsive layouts, and scroll-based interactions.

Frontend Developer (Freelance)

Flair Agency **July 2023 - January 2024, Remote**

- Built a responsive React/TypeScript marketing website with Tailwind CSS and Framer Motion, focusing on accessibility, SEO, cross-browser consistency, and performance.

Frontend Developer (Freelance)

Clearview Eye Center **March 2023 - April 2023, Remote**

- Designed and implemented a custom WordPress clinic website from a Figma design using PHP templates, HTML, CSS, and JavaScript.
- Built accessible responsive navigation, FAQ and testimonial interactions, keyboard/focus handling, large-text accessibility controls, and reduced motion support.
- Focused on technical SEO, maintainable content management, responsive behavior, and close visual parity with the source design.

Frontend Developer (Freelance)

Egypro Farm **October 2022 - February 2023, Remote**

- Developed a responsive agricultural product website with React.js, TypeScript, Tailwind CSS, and Zustand, including interactive categories, seasonal content, and carousel navigation.
